

CAMLIN FINE SCIENCES TO ACQUIRE 51% STAKE IN WANGLONG

Mumbai, India

Camlin Fine Sciences has entered into a Share Purchase Agreement to acquire 51% stake in Ningbo Wanglong Flavors and Fragrances Company Limited (Wanglong). Wanglong, a leading vanillin manufacturer produces vanillin through a patented process in its 3500 sq.m dedicated facility in the coastal city of Yuyao, Zhejiang province.

At our manufacturing plant in Ravenna, Italy, we produce Catechol the basic material used to make Vanillin and Ethyl-Vanillin. We use an environment-friendly process for producing vanillin which is the most trusted form of vanillin by the Food & Flavour Industry. Our fully vertically integrated supply chain can ensure the highest standards of vanillin that can offer complete traceability from Catechol to Vanillin. It consistently gives Vanesse, the most desired, sweetest & creamiest olfactory notes one could wish for. Each batch is carefully tested by our food flavourists so that we may deliver your requirements with consistency.

With our manufacturing facilities spread across 4 continents; China will further boost CFS' access into Asia market and rest of the world. CFS' global network along with deep industry knowledge is helping the Company set new benchmarks through delivery of high quality products across geographies. It also epitomizes our vision for growth.

Our brands Vanesse® (pure vanillin) and 'Evanil™ (ethyl vanillin) has growing customer base not only from food and flavor industry, but also manufacturers of fragrances, incense sticks, pharmaceutical industries and perfumeries. We have now expanded our bouquet of fragrance applications products to cater to the growing needs of our customers. We launched **Floral booster**, specially developed for incense sticks industry to enhance sweet note, sustain burning and aroma spreading properties; **Intense Green**, a fragrance and flavour chemical and **Vetigreen**, an aromatic chemical for home cleaning solutions, personal care products, cosmetics and incense sticks.

CFS will set new benchmark through delivery of high quality products across geographies

This robust step of acquiring Wanglong will ensure supply of high quality vanillin and will benefit CFS' customers in India and across the globe.

About Camlin Fine Sciences

Camlin Fine Sciences (CFS) is a provider of high-quality shelf life extension solutions including antioxidants, aroma ingredients and performance chemicals. We cater to the demands of our customers by bringing innovative high-quality products to the food, petfood, fragrances, animal nutrition, rendering, aquaculture and biofuel segments as well as pharmaceutical, dyes, petrochemical, agrochemical, textile and tanning industries.
